

property owners are totally responsible.

- Farmers and other local companies – can they help? JW contacted Biker who eventually sent a digger that cleared out some of the becks and deposited the results on Mill Lane. Peter Chilton explained that he tried to take some action but the water levels at Quarry Heads were far too great (another reminder that this was an exceptional storm).
- Resources – we can't wait for a feasibility study so should we raise the necessary money ourselves? Various discussions ensued, the gist of which was that in general, people seemed willing to contribute on the proviso that the whole village was circulated on this point.

It was agreed that a newsletter would be sent to all the villagers reporting on the action on some of the above points. The next meeting of the Parish Council will take place on Tuesday 23rd October at 7.30pm in the Village Hall. Jane and Dawn will be in attendance and everyone is invited to carry this issue further.

The meeting closed at 8.10pm.
